SUMMARY

7+ years of experience in data along with Masters across cloud, ETL/ELT pipelines, automation, dashboards, A/B testing, behavioral analytics, and survey design—supporting data modeling and warehousing, BI, product analytics, feature deployment, and experimentation across consulting, retail last-mile (capacity planning and delivery experience), energy, and healthcare.

SKILLS

Analytics: A/B Testing, Experiment Design, Behavioral Analytics, Dashboarding, ETL/ELT, Statistical modelling

Programming: Python, SQL; **Libraries:** Pandas, NumPy, Scikit-learn, Statsmodels, Keras, Seaborn, Matplotlib, PySpark

Tools: AWS (S3, Redshift, QuickSight, Lambda, Bedrock, EDX, Galaxy MDM), GCP (BigQuery, Looker), Azure Databricks, Tableau, PowerBI, DBT, Fivetran, Snowflake, Airflow, Git, API integration, Advanced Excel

EDUCATION

University of Wisconsin–Madison, Wisconsin School of Business

2022 – 2023

- Master of Science in Business Analytics (GPA: 3.84/4)
- Part-time Data Scientist, Center of TLM
 - Analyzed faculty-hiring and diversity datasets to identify recruitment gaps and inclusion improvements. (*Tableau*)
 - Executed A/B tests to evaluate article performance and surface high-engagement content, driving a 20% uplift in instructor subscriptions. (*A/B Experimentation, Analytics*)
 - Led qualitative faculty interviews to surface instructional and career barriers, identifying pain points and informing strategies to strengthen representation. (*Qualitative Research, Insights*)
 - Designed Qualtrics surveys to evaluate instructional quality and professional-development effectiveness, leveraging feedback to tailor learning initiatives and drive a 30% increase in participation. (*Qualtrics, Survey Design, Insights*)

National Institute of Technology Calicut

2015 – 2019

- Bachelor of Technology in Electrical & Electronics Engineering (GPA: 7.21/10)

PROFESSIONAL EXPERIENCE

A.P.Moller Maersk, Bengaluru (Remote)

03/26 – Present

Senior BI Analytics Engineer, PD&A

- Developed a centralized employee access and advisor-mapping dashboard, enabling users to identify PAs and access levels, improving visibility and reducing manual effort. (*Power BI, SQL, POINT database*)
- Leading the migration of the Global FTE reporting solution from Alteryx to Microsoft Fabric, modernizing data pipelines and reporting architecture to improve scalability, maintainability, and future analytics capabilities.

Amazon, Bengaluru

02/24 – 12/25

Business Intelligence Engineer, Last Mile, FP&A

- Recognized SME for Under-the-Roof last-mile reporting; led ALPS (Automated Labor Planning) launch across 53 Japan stations, replacing manual planning with automation, driving \$1.4M+ annual savings. (*SQL, S3, Redshift, QuickSight*)
- Automated ALPS plan generation across 53 JP delivery stations, reducing planning time from weeks to less than ~1 hr and ensuring full coverage during peak holidays. (*Python, XPath, Selenium, VS Code*)
- Built centralized MDM tables to standardize data across scheduling tools and automate paycode updates, eliminating manual dependencies on roster and saving ~1,700+ person-hours annually. (*EDX, Galaxy MDM, SQL, Redshift*)
- Built WLP vs ALPS comparison dashboards (DS/day/week), eliminating Excel reconciliation, improving adoption metric accuracy, and saving 10+ hours/month per regional planning team. (*SQL, ETL, Perfectmile*)
- Designed EU/JP FCLM Compliance Dashboard to validate “Main Activity” adherence, cutting manual audit efforts by ~70% and enhancing compliance visibility across HR, PXT, and planning teams. (*SQL, QuickSight, Redshift*)
- Built ALPS Roster Compliance dashboards across EU JP, detecting absence and NRW defects, reducing manual audits by ~40%, and improving trust and transparency. (*Redshift, SQL, ETL, QuickSight*)
- Launched centralized SIM/TT management, replacing fragmented team-level systems improving visibility and resolution speed, enabling real-time visibility using dashboards. (*River, QuickSight, Lambda, S3, SQL*)
- Built a centralized Clockwork Shiftcode Repository with JP-compliant automation, unifying ALPS, SSPOT, and MyTime mappings and reducing manual errors by ~60%. (*QuickSight, SQL*)
- Created FlexFlow for JP contract workforce to raise VET/VTO, eliminating false roster defects and improving workforce planning visibility. (*SQL, QuickSight, Python, Git CI/CD*)
- Delivered a comparison feature allowing planners to benchmark plan IDs and reducing manual metric validation, accelerating decision cycles, and saving ~50 hours/month. (*Python, Docker, S3, Git CI/CD, VSCode*)

- Optimized transporter efficiency through flexible stop handling, achieving a 1.53% attrition reduction with 0.87s improvement in service time surpassing cost-saving projections by \$15.66m. (*SQL, A/B feature, A/B metric*)
- Drove adoption of an internal GenAI chat agent, enabling faster discovery of metrics, schemas, and SOPs, and reducing dependency on manual documentation searches. (*RAG, Amazon Bedrock*)
- Owned dual-track EU reporting and product sprints, collaborating cross-functionally to deliver JP ALPS launch and AU ALPS rollout while maintaining BAU reporting continuity.
- Earned certification to conduct 3 BIE interviews; Mentored 2 interns; Translated ambiguous business questions into BI products, experimentation frameworks, and metric reporting

Generac Power Systems, Madison, WI, US

01/23 – 05/23

Data Scientist Intern, Energy

- Built a data pipeline in AWS; Analyzed large-scale datasets for market strategy insights (*SQL, ETL/ELT, Python web scraping*)
- Provided cost-effective strategic solutions and improved decision-making in energy management, developing a break-even optimization model. (*US wholesale energy market, Utility, Python*)
- Enhanced a geospatial visualization tool by incorporating additional features, providing real-time insights to track energy prices by location. (*KPIs, Tableau Dashboard, API*)

ZS Associates, Bengaluru

05/20 – 07/22

Senior Decision Scientist, Strategy Insights & Market Research

- Led COVID vaccine hesitancy market research among 7000 individuals, quantifying an expected hesitant consumer proportion using logistic regression and data-driven strategies. (*Behavioral, A/B, t-test*)
- Presented key insights of vaccine research findings to clients and leadership, securing contracts with Fortune 100 pharmaceuticals. (*executive narrative building*)
- Created marketing campaigns, reducing client promotion cost by 50%, by integrating customer segmentation with message testing analysis to determine impactful messaging for physicians. (*ATU study, KPIs, Multivariate analysis*)
- Achieved 25% brand perception improvement for \$902M HCV drug by organizing workshops with marketing teams to upgrade sales force effectiveness. (*Qualitative Research*)
- Refined global patient experience by 1.5x by in-depth pain point analysis, optimizing product onboarding and transitioning pay-as-you-go users to subscriptions (*K-means, Hypothesis testing, Voice of Customer*)
- Demonstrated a 1.8-win ratio among physicians, directing go-to-market strategy for a phase 3 product across 5 countries, showcasing its competitive advantage. (*Demand estimation, Opportunity assessment, A/B testing*)
- Designed A/B experiments for a Fortune 100 streaming platform to identify retention barriers, messaging drivers, unlocking ~30M incremental subscribers. (*A/B Testing, Behavioral Analytics, Growth Strategy*)
- Led a ATU study to quantify demand for PrEP injectables, defining KPIs to segment switch-ready users and size a \$36M quarterly revenue opportunity. (*ATU, Segmentation, KPIs, Demand Estimation*)
- Managed end-to-end 15+ project lifecycles with a turnover of \$500K, ensuring on-time and quality deliverables; Conducted learning sessions for 12 newcomers for Advanced Excel and R; Mentored four new associates in pod.

M.H. Alshaya Co., Bengaluru

07/19 – 04/20

Data Analyst, IT Retail Operations

- Implemented and managed SQL database for retail products in 2500+ stores across 15 countries, troubleshooting supply chain processes and resulting in streamlined data infrastructure. (*Big Data, ETL, PySpark, Airflow, SQL*)
- Achieved 60% reduction in enterprise system operational errors, involving central store management, real-time data polling, transactions, and e-commerce orders, while collaborating with eight internal teams. (*RCA, Jira, Product*)
- Automated daily reporting, including store footfall data for managers, augmenting operational efficiency by 25%. (*Tableau*)

PROJECTS

Battery Bidding Strategy Optimization: Modeled two autobidder strategies for a utility-scale battery in the Australian NEM to compare 5-minute market revenues and identify optimal daily switching rules using price trends, throughput analytics, and forecast simulations. (*Advanced excel, Python*)

Bike Demand Forecasting: Ranked 1806 in Kaggle's bike demand forecasting competition. Identified the best machine learning models using RMSE. (*Python, ML*)
