SUMMARY

Masters and 5+ years in data across cloud, ETL/ELT pipelines, automation, dashboards, A/B testing, behavioral analytics, and survey design—supporting data modeling and warehousing, BI, product and metric analytics, feature deployment, and experimentation across consulting, retail last-mile (capacity planning and delivery experience), energy, and healthcare.

SKILLS

Programming: Python, R, SQL; **Libraries:** Pandas, NumPy, Scikit-learn, Statsmodels, TensorFlow, PyTorch, Keras, Seaborn, Matplotlib, Plotly, PySpark

Tools: AWS (S3, Redshift, QuickSight, Lambda, Bedrock, EDX, Galaxy MDM), GCP (BigQuery, Looker), Azure Databricks, Tableau, PowerBI, DBT, Fivetran, Snowflake, Airflow, Git, API integration, ETL/ELT pipelines, Advanced Excel

PROFESSIONAL EXPERIENCE

Amazon, Bengaluru

02/24 – Present

Business Intelligence Engineer, Last Mile, FP&A

- Recognized SME for Under-the-Roof last-mile reporting; led ALPS (Automated Labor Planning) launch across 53 Japan stations, replacing manual planning with automation, driving \$1.4M+ annual savings. (SQL, S3, Redshift, QuickSight)
- Automated ALPS plan generation across 53 JP delivery stations, reducing planning time from weeks to less than ~1 hr and ensuring full coverage during peak holidays. (Python, XPath, Selenium, VS Code)
- Built centralized MDM tables to standardize data across scheduling tools and automate paycode updates, eliminating manual dependencies on roster and saving ~1,700+ person-hours annually. (EDX, Galaxy MDM, SQL, Redshift)
- Built WLP vs ALPS comparison dashboards (DS/day/week), eliminating Excel reconciliation, improving adoption metric accuracy, and saving 10+ hours/month per regional planning team. (SQL, ETL, Perfectmile)
- Designed EU/JP FCLM Compliance Dashboard to validate “Main Activity” adherence, cutting manual audit efforts by ~70% and enhancing compliance visibility across HR, PXT, and planning teams. (SQL, QuickSight, Redshift)
- Delivered a comparison feature allowing planners to benchmark plan IDs and reducing manual metric validation, accelerating decision cycles, and saving ~50 hours/month. (Python, Git, VSCode)
- Optimized transporter efficiency through flexible stop handling, achieving a 1.53% attrition reduction with 0.87s improvement in service time surpassing cost-saving projections by \$15.66m. (SQL, A/B feature, A/B metric)
- Earned certification to conduct 3 BIE interviews; Mentored 2 interns; Managed dual-track EU reporting and EU product sprints, cross-functional collaboration with multiple teams to deliver the JP ALPS launch and AU ALPS rollout.

Generac Power Systems, Madison, WI, US

01/23 – 05/23

Data Engineer Intern, Energy

- Built a data pipeline in AWS; Analyzed large-scale datasets for market strategy insights (SQL, ETL/ELT, Python web scraping)
- Provided cost-effective strategic solutions and improved decision-making in energy management, developing a break-even optimization model. (US wholesale energy market, Utility, Python)

ZS Associates, Bengaluru

05/20 – 07/22

Senior Strategy Analyst, Customer Insights & Market Research

- Led COVID vaccine hesitancy market research among 7000 individuals, quantifying an expected hesitant consumer proportion using logistic regression and data-driven strategies. (Behavioral insights, A/B testing, t-test)
- Created marketing campaigns, reducing client promotion cost by 50%, by integrating customer segmentation with message testing analysis to determine impactful messaging for physicians. (ATU study, KPIs, Multivariate analysis)
- Demonstrated a 1.8-win ratio among physicians, directing go-to-market strategy for a phase 3 product across 5 countries, showcasing its competitive advantage. (Demand estimation, Opportunity assessment, A/B testing)
- Designed A/B experiments for a Fortune 100 streaming platform to identify retention barriers, messaging drivers, unlocking ~30M incremental subscribers. (A/B Testing, Behavioral Analytics, Growth Strategy)
- Managed end-to-end 15+ project lifecycles with a turnover of \$500K, ensuring on-time and quality deliverables; Conducted learning sessions for 12 newcomers for Advanced Excel and R; Mentored four new associates in pod.

M.H. Aishaya Co., Bengaluru

07/19 – 04/20

Operations Analyst, IT Retail Operations

- Implemented and managed SQL database for retail products in 2500+ stores across 15 countries, troubleshooting supply chain processes and resulting in streamlined data infrastructure. (Big Data, ETL, PySpark, Airflow, SQL)
- Achieved 60% reduction in enterprise system operational errors, involving central store management, real-time data polling, transactions, and e-commerce orders, while collaborating with eight internal teams. (RCA, Jira, Product)

EDUCATION

University of Wisconsin–Madison, Wisconsin School of Business

2022 – 2023

- Master of Science in Business Analytics (GPA: 3.84/4)

National Institute of Technology Calicut

2015 – 2019

- Bachelor of Technology in Electrical & Electronics Engineering (GPA: 7.21/10)
