

ATHULYA SURENDRAN KRISHNALEELA

7736234730 • skathulyawork@gmail.com • [LinkedIn](#) • [Git](#) • [Portfolio](#)

SKILLS

Programming: Python, R, SQL, PostgreSQL; **Libraries:** Pandas, NumPy, Scikit-learn, Statsmodels, TensorFlow, PyTorch, Keras, Seaborn, Matplotlib, Plotly, PySpark

Tools: AWS (S3, Redshift, QuickSight, Glue, SageMaker), GCP (BigQuery, Looker), Azure Databricks, Tableau, PowerBI, DBT, Fivetran, Snowflake, Airflow, Git, API integration, ETL/ELT pipelines, EDX, Advanced Excel

PROFESSIONAL EXPERIENCE

Amazon, Bengaluru

02/24 - Current

Business Intelligence Engineer

- Recognized SME for Under-the-Roof last-mile reporting; led ALPS (Automated Labor Planning) launch across 53 Japan stations, replacing manual planning with automation, driving ₹1.4M+ annual savings. (SQL, S3, Redshift, QuickSight)
- Automated ALPS plan generation across 53 JP delivery stations, reducing planning time from weeks to less than ~1 hr and ensuring full coverage during peak holidays. (Python, XPath, Selenium, VS Code)
- Built centralized MDM tables to standardize data across scheduling tools and automate paycode updates, eliminating manual dependencies on roster and saving ~1,700+ person-hours annually. (EDX, Galaxy MDM, Redshift)
- Built WLP vs ALPS comparison dashboards (DS/day/week), eliminating Excel reconciliation, improving adoption metric accuracy, and saving 10+ hours/month per regional planning team.
- Designed EU/JP FCLM Compliance Dashboard to validate “Main Activity” adherence, cutting manual audit efforts by ~70% and enhancing compliance visibility across HR, PXT and planning teams. (SQL, QuickSight, Redshift)
- Centralized SIM/TT management by launching a unified River workflow and dashboards, replacing fragmented team-level systems improving visibility, resolution speed, and cross-team coordination. (River, QuickSight, Lambda, S3, SQL)
- Created FlexFlow for JP contract workforce to raise VET/VTO, eliminating false roster defects and improving workforce planning visibility. (Datatnet, QuickSight)
- Optimized transporter efficiency through flexible stop handling, achieving a 1.53% attrition reduction with 0.87s improvement in service time surpassing cost-saving projections by 15.66m (On-road, A/B testing, AWS)

Generac Power Systems, Madison, WI, USA

01/23 - 05/23

Data Engineer, Internship

- Built a data pipeline in AWS; Analyzed large-scale datasets for market strategy insights (SQL, ETL/ELT, Python web scraping)
- Provided cost-effective strategic solutions and improved decision-making in energy management, developing a break-even optimization model (US wholesale energy market, Utility, Python)
- Enhanced a geospatial visualization tool by incorporating additional features, providing real-time insights to track energy prices by location (KPIs, Dashboard, API)

ZS Associates, Bengaluru

05/20 - 07/22

Senior Strategy Analyst, Customer Insights Market Research

- Led COVID vaccine hesitancy market research among 7000 individuals, quantifying an expected hesitant consumer proportion using logistic regression and data-driven strategies (Behavioral insights, A/B testing, t-test)
- Created marketing campaigns, reducing client promotion cost by 50%, by integrating customer segmentation with message testing analysis to determine impactful messaging for physicians (ATU study, KPIs, Multivariate analysis)
- Refined global patient experience by 1.5x by in-depth pain point analysis, optimizing product onboarding and transitioning pay-as-you-go users to subscriptions (K-means, Hypothesis testing, Voice of Customer)
- Demonstrated a 1.8-win ratio among physicians, directing go-to-market strategy for a phase 3 product across 5 countries, showcasing its competitive advantage (Demand estimation, Opportunity assessment, A/B testing)
- Managed end-to-end 15+ project lifecycles with a turnover of \$500K, ensuring on-time and quality deliverables; Conducted learning sessions for twelve newcomers for Advanced excel and R; Mentored four new associates in pod.

M.H.Aishaya.Co, Bengaluru

07/19 - 04/20

Operations Analyst, IT Retail Operations

- Implemented and managed SQL database for retail products in 2500+ stores across 15 countries, troubleshooting supply chain processes and resulting in streamlined data infrastructure (Big Data, ETL, PySpark, Airflow)
- Achieved 60% reduction in enterprise system operational errors, involving central store management, real-time data polling, transactions, and e-commerce orders, while collaborating with eight internal teams (RCA, Jira, product management)

EDUCATION

University of Wisconsin-Madison, Wisconsin School of Business, Madison, WI, US

2022 - 2023

- Master of Science in Business Analytics (GPA: 3.84/4)

National Institute of Technology, Calicut

2015 - 2019

- Bachelor of Technology in Electrical and Electronics Engineering (GPA:7.21/10)
